

Bug Fix Handover Report

Project Name: Miles Web
Client: Miles
Date: June 18, 2025
Developer: Oshadhi Herath , Kasun

Summary of Fixes

#	Issue Description	Status	Notes
A	Certain uploaded Images did not expand beyond thumbnail view.	 Fixed	Admin can now click and view full images.
B	New users were not listed at the top.	 Fixed	User list now sorted by newest first.
C	No notification/email sent to admin on new user registration.	 Fixed	Admin now receives an email.
D	After approval, users can edit profile without needing re-approval.	 Fixed	Once approved, users had to be re-approved after edits.

How It Works Now

1. Image Viewing for Admin

- All uploaded user Images now expand when clicked.
- Thumbnails display clearly and open in a newtab.

2. User List Sorting

- Admin sees newest users at the top by default (sorted by ID DESC).

3. Admin Notification

- Admin receives:
 - **Email notification** when a new user registers.

4. Post-Approval Edits

- Once a user is approved, they may edit their profile without requiring a second approval.
 - Approval status remains unchanged unless manually revoked.
-

Technical Summary

- Updated: `UserController@getAll()` query (sorting by `id desc`)
 - Image display logic fixed in: `user-profile.blade.php` and `admin-review.blade.php`
 - Notification system: Added trigger on user registration
`UserModuleController.php`
 - Approval logic updated in: `UserApprovalMiddleware.php`
`AdminUserModuleController.php`
-

UAT Confirmation

#	Item	Client Verified (✓)
A	Image expansion works	☐
B	New users appear at top	☐
C	Admin gets notified by email	☐
D	Profile editable after approval	☐
